

ORIGAMI BOOKMARK

A woodland habitat is one where trees are the dominant plant form. A prime example of this in Brooklyn Bridge Park is the tree canopy and dense vegetation of Pier 1. Create your own Origami Bookmark using the attached animal sheets. As the Park's woodland habitat matures, we hope to see more woodland animals in the Park!

MATERIALS YOU'LL NEED:

- Animal bookmark sheets (attached)
- Glue
- Coloring materials (colored pencils, crayons, pens, etc.)
