Gross margin measures how much sales Nestle has after spending on all direct costs used in manufacturing and selling its food and beverages products. As the chart shows, Nestle has a track record of efficiency by consistently reporting high gross margin above 40%.

46.0% 44.5% 45.0%-44.0%-43.0%-42.0%-41.0% 40.0%-39.0%-2015

PBT margin tells us how much profit Nestle makes on each Naira of Revenue, prior to taxes, while PAT margin depicts the percentage of revenue left over after all expenses have been paid. Nestle's PBT and PAT margin indicates that it has provided more value by delivering attractive earnings to shareholders through economic cycles.

Operating margin shows the proportion of revenue that is available to Nestle, after paying for variable costs like costs of raw materials, packaging of Nestle's products, etc. In Q1 2020, Nestle made N0.249k before interest and taxes for every Naira of sales.

■ 2015 ■ 2016 ■ 2017 ■ 2018 ■ 2019 ■ Q1 2020

EPS shows the amount of money each stock would receive if all the profits were distributed to the outstanding shares at the end of the year.

06

ROE ratio reveals how much money Nestle earns on the money contributed by shareholders. A glance at the chart tells us that Nestle is efficient in utilizing investment financing to grow their business, especially between 2017 and 2019 where it reported attractive ROE.

Net cash flow is the fuel that helps Nestle expand, develop new products, buy back stock, pay dividends, and conduct their day to day business activities. The chart shows Nestle's steady positive net cash flow positions.

Return on assets (ROA) tells us how profitable Nestle is compared to its total assets. It shows how Nestle uses its assets to generate income. For example, in 2019, every N1 that Nestle invested in assets generated NO.4 of net income before tax.
