

DroneDeploy For Any Size Organization

DroneDeploy's mission is simple: make drone data accessible to everyone, everywhere. Our platform provides you with immediate access to aerial site intelligence in a way that is safer, faster, and less costly than any other method of assessment. DroneDeploy offers a complete end-to-end system of record to increase workflow efficiencies as you scale your drone program.

Pick the right plan for your needs; spend less time back and forth comparing features and more time flying drones.

	Pro Plan For Individuals	Business Plan For Individuals	Enterprise Offerings For Multi-Users
Ideal For	Individual drone flight and mapping	Individuals that require more advanced flight and processing capabilities	Companies of any size that want to establish and scale their drone program
User Access	Pro Plan helps individuals complete basic flight and mapping through the mobile app (iOS or Android)	Business Plan helps individuals plan complex flights with advanced processing options	Enterprise Solutions help organizations manage multiple teams and projects with integrations, APIs, SSO, advanced reporting, compliance tools, and opera- tions management
Support	Email	Email and Chat	Email, Chat, and Phone
Customer Success	n/a	n/a	Adoption Management
